

I am concerned that important local programming that brings us information that my family needs and also programming that we enjoy may be disrupted by Low Power FM stations (LPFMs).

K-LOVE programming serves our community as an important alternate news service, bringing us commentary, viewpoints and news that is unavailable on any other station that broadcasts a clear signal here in our community. If LPFMs are allowed to interfere with, block or otherwise make K-LOVE's signal less clear, an important news and entertainment service will be lost to my family and other significant portions of our community.

It is definitely in the public interest for all sides of issues and news to be presented to the community. Again and again, our nations leaders and courts have affirmed the necessity of a free press and free and open dissemination of news, commentary and viewpoints. Also, K-LOVE provides free entertainment and music of a genre and type that is not otherwise usually available on the airwaves in our community.

Thank you for your time and interest. Please do not allow the new LPFMs to displace important alternative news and entertainments sources, such as K-LOVE, that are already in place.

Thank you,

Jay Enterkin
